AHMED ALI AL-KAMAL

+967 770923337 | Ahmaad.website@gmail.com | github.com/12Ahm-webSite | Sana'a, Yemen

PROFESSIONAL SUMMARY

IT graduate with hands-on experience building full-stack web applications and mobile apps. Proficient in Django, React, and Flutter. Passionate about clean code, user experience, and solving real-world problems through software.

EDUCATION

Bachelor of Information Technology | *Expected: 2026*

University of Modern Sciences (UMS) — Sana'a, Yemen

Graduation Project: LoomApp — A full-stack web platform built with Django

TECHNICAL SKILLS

Languages: Python, JavaScript, Dart, Java, C#

Frontend: HTML, CSS, React JS, Flutter

Backend: Django, Django REST Framework, ASP.NET, Laravel

Databases: SQLite, MySQL (via Django ORM)

Tools & Platforms: Git, GitHub, VS Code, Visual Studio 2022

Other: REST APIs, Authentication & Permissions, ATS-optimized UI

PROJECTS

LoomApp | *Django · Python · HTML/CSS · SQLite*

- Built a full-stack web platform as a graduation project featuring user authentication, role-based permissions, and profile management.
- Implemented a star-rating system with conditional rendering for profile owners vs. visitors.
- Conducted thorough code review covering models, views, and authentication flows.
- GitHub: github.com/LoomProject/loom

LoomApp Front-End (React) | *React JS · JavaScript*

- Developed a React-based front-end interface for LoomApp with component-based architecture.
- GitHub: github.com/LoomProject/Front-endReact

Nova | *HTML · CSS · JavaScript - Laravel*

- Designed and developed a responsive website with a modern UI layout.
- GitHub: github.com/12Ahm-webSite/Nova

Destini — Branching Story Game | *Flutter · Dart · Riverpod*

- Built an interactive branching narrative game with 7 different story endings.
- Integrated bilingual support (Arabic/English) using locale providers and Google Fonts Cairo.
- Implemented chapter unlock logic and state management using Riverpod.

- GitHub: github.com/12Ahm-webSite/destini_starting_master

Internet Speed Meter App | *Flutter · Dart · C++*

- Developed a mobile application to measure and display real-time internet speed.
- GitHub: github.com/12Ahm-webSite/internet_speed_meter_app

ChatApp | *Django · Python*

- Built a real-time chat application with backend powered by Django.
- GitHub: github.com/12Ahm-webSite/ChatApp

To-Do API | *Django REST Framework · Python*

- Created a RESTful API for a to-do application supporting CRUD operations and database sync.
- GitHub: github.com/12Ahm-webSite/todo_api-master

Three.js Scene | *JavaScript · Three.js*

- Explored 3D web rendering using Three.js to build an interactive visual scene.
- GitHub: github.com/12Ahm-webSite/threejs
